DETAILED ACTION

Receipt of Papers

Receipt is acknowledged of the Declaration, Fee, Extension of Time, Preliminary Amendment A, Drawings, and Corrected Filing Receipt, all received by the Office May 21, 2002, as well as the Information Disclosure Statement, received September 30, 2002.

Claim Objections

Claim 10 objected to because of the following informalities: claim 10 depends from itself. Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-23 of US Patent No. 6,492,379 AND claims 1-22 of US Patent No. 6,482,830. An obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but an examined application claim in not

Art Unit: 1615

patentably distinct from the reference claim(s) because the examiner claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985). Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of both the patents and the application recite a polymorphic form of 9-nitrocamptothecin, wherein the polymorph is characterized by particular differential scanning calorimetry, NMR spectra, and X ray diffraction patterns. In particular, the claims of Patent 6,482,830 and the Application overlap, in that the patent claims an exotherm between 272 and 274 (see claim 1), and the Application claims an exotherm of between 273.6 and 275.6 (see claim 1). Additionally, both patents and the Application claim a pharmaceutical composition comprising the polymorph and a carrier.

Claims 1-30 are provisionally rejected under the judicially created doctrine of double patenting over claims 1-22 of copending Application No. 10/082,003. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: a polymorphic form of 9-nitrocamptothecin.

An obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but an examined application claim is not patentable distinct from the

Art Unit: 1615

reference claim(s) because the examiner claim is either anticipated by , or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985). Although the conflicting claims are not identical, they are not patentably distinct from each other because they both disclose a polymorphic form of 9-nitrocaptophecine, as well as a pharmaceutical composition comprising the polymorph and a pharmaceutically acceptable carrier.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application.

Suggestions by Examiner

In order to expedite prosecution, it is recommended that Applicant amend claim 9 to recite, a polymorph of 9 -nitrocaptophecine, so that this claim is commensurate in scope with the remaining claims.
